Environmental reports

Because of the length of time which passed between excavation and publication, many people were involved in this project, some now sadly deceased. Dr George Wharton Ian Hodgson (Illus 65) died in 1986, Nicholas Quentin Bogdan in 2002 and James B Kenworthy in 2011. Therefore, on behalf of all the authors, living and dead, grateful thanks are extended to the following individuals and institutions from whose expert knowledge the contributors to this volume benefitted. Thanks are particularly extended to Olwyn Owen of Historic Scotland, for her patient yet determined approach to publishing this material, to David Perry for his retentive memory of the site over more than thirty years and to the members of Tayside and Fife Archaeological Committee (TAFAC) who have supported this project from its earliest days.

Mammal bone

Especial thanks are due to Rose Smith, Administrator of the Perth High Street Archaeological Excavation for administering the research, typing various drafts of the manuscript and unfailing support and friendship over the decades.

Dr David Breeze and Christopher Tabraham of the (then) Ancient Monuments Branch of the Scottish Development Department (now Historic Scotland).

Barbara Wishart, Duncan of Jordanstone College of Art, for her relentless pursuit of documentary evidence and her considerable efforts in their translation.

Dr Juliet Clutton-Brock of the British Museum (Natural History) for her help in identifying difficult specimens.

Dr M L Ryder and John Woolliams (Animal Breeding Research Unit, Rosslyn, Midlothian), the late Barbara Noddle (University of Cardiff), Dr A L Long (Hancock Museum, Newcastle), David Geddes (Paisley College of Technology), Dr P L Armitage (British Museum (Natural History)), Tom Oliver (Town Planning Department, University of Dundee), Dr Sebastian Payne and Dr R A Harcourt for discussing zoological details of this work and its possible agricultural implications.

Colin Buy of the Computing Department, University of Dundee.

Illus 65 George Wharton Ian Hodgson, osteologist, 1970s (on left of photograph) contemplates the High Street assemblage.

Mr Buchanan of Messrs Millar and McKay, Perth for access to the records of the Fleshers Guild.

Professor G W S Barrow, St Andrews University for advice on interpreting some of the original literary sources.

Marion Stavert for access to her transcriptions of the Perth Guildry Book.

J Jackman, Trent Bridge Leather Works, Nottingham for information on the preparation of leather; the Governors of the former Duncan of Jordanstone College of Art, Dundee for the provision of accommodation for the project over a ten year period.

Gertie Whittet, Mary Bell and Dennis Chapman of Duncan of Jordanstone College of Art for their

administrative, technical and moral support.

The library staff at Dundee University, Duncan of Jordanstone College of Art, and the Sandeman and A K Bell Libraries, Perth.

Staff of the Natural History Department, National Museums Scotland, particularly Dr Jerry Herman and Dr Andrew Kitchener.

The staff and volunteers of the original excavation who washed and marked each one of the many bone fragments, in particular, the late Mrs Catherine Coventry.

Bird bone

Staff of the Natural History Departments at the National Museums Scotland, Edinburgh, Perth Art Gallery and Museum and Dundee Museums (Barrack Street Collections Unit) for access to the skeletal collections, particularly Bob McGowan of NMS.

RSPB, Vane Farm; Brian Cowling, SSPCA; Liz Pawley, SNH; present and former colleagues at SUAT Ltd and Alder Archaeology (particularly Fraser Stewart, Calum McWilliam, James McCusker, Jen Anderson, Ray Cachart, David Bowler, Derek Hall, David Perry, Johanna Schofield, Carol Milne, Frank Moran); and Charles Rooney, Chic Nicoll, Leah Cece, Robert Smith, Jennifer Smith, the family cats and all those others who have helped keep a watchful eye open for road kills and other casualties suitable for conversion into comparative material.

Barbara West, Dept of Zoology, British Museum (Natural History) and Professor Don Brothwell, Dept of Archaeology, University of York for information regarding chicken sizes.

Fish bone

John Lock, formerly of the Environmental Archaeology Unit, University of York, for sieving the soil samples and extracting the fish remains; expending considerable time and effort ordering the hand-excavated bones, which were packed by accession number, into contexts; also cataloguing the vertebral centra from the 1977 excavation and preparing computer data files; and John Carrott of the EAU for help in locating original records.

Nicholas Q Bogdan, George W I Hodgson, Allan Hall, Harry Kenward and Terry O'Connor all of whom made helpful comments on the first draft of this report.

Plant remains

Thanks are due to Dr Jim Dickson of the Department of Botany, University of Glasgow and to John Lock, York for sieving and extracting the plant remains from the raw soil samples.

Mollusc report

Claire Pannell, Assistant Curator Mollusca, National Museums Scotland for her comments on the text.

William Finlayson and Kathleen McSweeney for sorting and making preliminary lists of the molluscan material.

Brian Spencer, Department of Medieval Antiquities, Museum of London for his comments on scallop pilgrim badges.

David Perry for historical advice regarding the Tain mussel fishery.

Feather report

Olwyn Owen of Historic Scotland for arranging the feather analysis.

Dr Andrew Kitchener of the Natural History Section of the National Museum of Scotland, Edinburgh, for his input and reference material for this study.

The worked bone

Catherine Smith gratefully acknowledges the help provided by Dr Jerry Herman of National Museums Scotland in facilitating access to the animal bone assemblage, on various occasions throughout the years, and allowing SUAT Ltd to borrow several fragments of worked bone which had not previously been recorded. Thanks also to museum volunteers who reboxed the animal bone assemblage.

Mark Hall would like to thank Duncan Brown, Mark Simmons, Jeremy Duncan, Doreen Hall, Malcolm Jones, Dave Munro (illustration of ivory knife handle), Paul Adair (photography) and Historic Scotland for their sponsorship of the original paper on the ivory knife handle.

The stone, flint and glass

Thanks are due to Mark Hall and Mark Simmons of Perth Museum and Art Gallery, for arranging access to the collections and corroboration of geological identifications. Torben Ballin kindly commented on the flint. Thanks also to Iain Fraser of RCAHMS for archive advice.

Photography and illustration

For those photographs supplied by Perth Museum and Art Gallery, thanks are due to Mark Hall and Paul Adair (Illus 31, 33, 34, 42, 44, 64). (Illus 31 and 34 are attributable to the studio of Magnus Jackson, Perth). Other photographs were taken by staff of the Perth High Street Archaeological Excavation team, Denis Chapman of Duncan of Jordanstone College of Art, Dundee, and by SUAT Ltd and Alder Archaeology, in particular, David Bowler, Tamlin Barton Adrian Cox, Derek Hall, Becky Smith and Catherine Smith.

Maps, diagrams and illustrations of the worked bone (Illus 1, 2, 19, 38, 50–54) are by Dave Munro of SUAT Ltd. Illus 55–63 and the back cover photograph of the stone whorls are by Tamlin Barton. Thanks are also due to Tamlin Barton and Sapphire Sherwood for help in scanning and editing graphics. The original version

of Illus 19 was drawn by R Harris, draughtsman on the Perth High Street Archaeological Excavation. The cover painting and reconstruction of the medieval pig (Illus 9) are by Maureen Rooney Mitchell, the medieval midden (Illus 47) by Steve Earl and the backland reconstruction (Illus 49) by Roger Dennis.

The Excavation and publication

For information regarding the PHSAE Committee and the excavation itself, readers are referred to the Acknowledgement section of Fascicule 1, where we extend grateful thanks and appreciation to all those who contributed to the PHSAE project from inception to publication.

The post-excavation process was managed by Derek Hall, formerly of SUAT Ltd, from 2004–11.

This fascicule was collated and prepared for publication by Catherine Smith who is grateful to the Tayside and Fife Archaeological Committee Editors, Lisbeth Thoms and Derek Hall and to all colleagues who offered comments and corrections on the texts.

‘a good report maketh the bones fat’
(Proverbs 15:30, King James version)
